Jean-Christophe Chatelain

WEB Developer

PROFESSIONAL PROFILE

Experienced Web developer with over 14 years' experience in the field, having worked for the agricultural association AGRIDEA. I specialise in C# development using the .Net framework, as well as creating complex front-end applications using Angular, React.js and JavaScript, for example. My background also includes experience in Linux server administration and Docker container management. My passion for innovation has led me to actively explore the field of blockchain and new technologies. I thrive on both teamwork and autonomous projects, all with a touch of humour and a constant desire to learn.
